

# YES-2000C

## COMPRESSION TESTING MACHINE

The series testing machine is mainly used to the compression test of concrete, cement and cement products, various blocks, hollow bricks, tiles and other ordinary building materials.

### Applications

It is widely used in different construction materials works, different project building sites, quality control departments, colleges and institutes as well as other areas and works concerning compression tests.

### Technical Specification

Specification	YES-2000C
Max. capacity (KN)	2000
Measuring range	4%-100% of FS
Relative error of reading	$\leq \pm 1\%$
Max. distance between two platen (mm)	420
Compression platen size (mm)	$\Phi 300$
Max. piston stroke (mm)	0-100
Max. piston speed (mm/min)	Approx. 30
Column clearance (mm)	368*318
Oil pump motor power (KW)	1.5
Whole dimensions (mm)	590*580*2050
Whole weight (KG)	Approx. 2000
